CARE & MAINTENANCE

An undermount rim-to-stone joint is the one place to watch: inspect the silicone seal annually and re-run it if it lifts, ten minutes of work that keeps water out of the cabinet. The bowl itself asks the standard fireclay routine, warm rinse daily, cream cleaner weekly, no steel wool. The dark Midnight Cobalt glaze shows soap film sooner than pale glazes; a quick towel-dry keeps it ink-deep.

Fireclay is a kiln-fired ceramic; dimensional variance of ±2% is normal under the B45 standard. Always template from the delivered sink.
