CARE & MAINTENANCE

Bathroom chemistry, toothpaste, cosmetics, hard water, wipes off the non-porous glaze with a damp cloth. Weekly, use any pH-neutral bathroom cleaner; avoid abrasive powders on the hand-trimmed rim. Limescale rings in hard-water areas lift with diluted vinegar. The glaze will not fade under UV, a consideration for basins beneath bathroom windows.

Fireclay is a kiln-fired ceramic; dimensional variance of ±2% is normal under the B45 standard. Always template from the delivered sink.
